

The Fight for Rights

Slideshow Project Book Browse

The fight for rights has a long history in the US. We recently learned about the Civil Rights Movement, which helped bring equality for African Americans. In this project you will work with a partner to create a google slideshow presentation on another movement or person who was part of the fight for rights in US History.

Use the cart provided by our library to explore four different people or movements. Do a quick book browse and write a sentence or two for each book. Then circle the person or movement you would most like to do for your google slideshow presentation.
