

## The Dawn of the Industrial Age

Pages 170 - 173

When and where did the Industrial Revolution start?

Contrast Life in 1750 with life in 1850 by filling in the missing information from the chart below:

1750	1850
People lived in villages	People lived in cities
People traveled by horse drawn cart	
	People bought clothing made by someone else
People sent letters to one another	
	Dentists used anesthetic

How long ago was the **first** agricultural revolution?

What does it mean to **domesticate** animals?

Look at the examples of cause and effect below and fill in the missing boxes.

Cause	Effect
Farmers mix soils and rotate crops	more crops could be grown on the same amount of land
Jethro Tull invents the seed drill	
Rich landowners enclosed lands to raise sheep	

Many farmers were thrown off their land due to the Enclosure Movement	
	The population grew rapidly
John Newcomen and James Watt invented the steam engine	
Abraham Darby used coal instead of iron to smelt iron	

Summarize the main ideas in Chapter 5 section 1, The Dawn of the Industrial Age
